- open source confluence tool
- <http://cl-informatik.uibk.ac.at/software/csi/ho>

Features

CSI^{ho}

- confluence tool for higher-order pattern rewrite systems
- weak orthogonality
- development closedness
- critical pair lemma
- termination: HORPO, static dependency pairs, WANDA
- modularity for left-linear systems
- addition and removal of redundant rules
- finding peaks via forward closures^{new}
