

Hakusan v0.11 (Kawano, Hirokawa, Shintani, JAIST)

confluence tool for left-linear TRSs

Hakusan v0.11 (Kawano, Hirokawa, Shintani, JAIST)

confluence tool for **left-linear** TRSs

1 CeTA-certifiable proofs

joint work with Kim & Thiemann (CPP 2024)

Hakusan v0.11 (Kawano, Hirokawa, Shintani, JAIST)

confluence tool for **left-linear** TRSs

- 1 CeTA-certifiable proofs joint work with Kim & Thiemann (CPP 2024)
- 2 **rule removal** by rule labeling & critical pair systems (LMCS & IWC 2024)

confluence tool for **left-linear** TRSs

- ① CeTA-certifiable proofs joint work with Kim & Thiemann (CPP 2024)
- ② **rule removal** by rule labeling & critical pair systems (LMCS & IWC 2024)

Theorem (critical pair system)

$CR(\mathcal{R}) \Leftrightarrow CR(\mathcal{S})$ if \mathcal{R} is LL, $\mathcal{S} \subseteq \mathcal{R}$, $PCP(\mathcal{R}) \subseteq \downarrow_{\mathcal{R}}$, $SN(\mathcal{P}/\mathcal{R})$, and $\mathcal{R}|_{\mathcal{S}} \subseteq \rightarrow_{\mathcal{S}}^*$

- $\mathcal{P} = \left\{ \begin{array}{l} s \rightarrow t \\ s \rightarrow u \end{array} \middle| t \xleftrightarrow[\mathcal{R}]{\#} s \xrightarrow[\mathcal{R}]{\epsilon} u \text{ is parallel critical peak but not } t \xleftrightarrow[\mathcal{S}]{*} u \right\}$
- $\mathcal{R}|_{\mathcal{S}} = \{ \ell \rightarrow r \in \mathcal{R} \mid \mathcal{F}un(\ell) \subseteq \mathcal{F}un(\mathcal{S}) \}$

Confluence Proof by Rule Removal

consider left-linear TRS \mathcal{R} :

$$s(p(x)) \xrightarrow{1} p(s(x))$$

$$p(s(x)) \xrightarrow{2} x$$

$$\infty \xrightarrow{3} s(\infty)$$

Confluence Proof by Rule Removal

consider left-linear TRS \mathcal{R} :

$$s(p(x)) \xrightarrow{1} p(s(x))$$

$$p(s(x)) \xrightarrow{2} x$$

$$\infty \xrightarrow{3} s(\infty)$$

① $CR(\mathcal{R}) \iff CR(\{3\})$ by critical pair system:

Confluence Proof by Rule Removal

consider left-linear TRS \mathcal{R} :

$$s(p(x)) \xrightarrow{1} p(s(x))$$

$$p(s(x)) \xrightarrow{2} x$$

$$\infty \xrightarrow{3} s(\infty)$$

① $CR(\mathcal{R}) \iff CR(\{3\})$ by critical pair system:
